SUBJECT: GM Test Data Center

The dexosTRC.org website has transitioned to the GM Test Data Center (<https://GMTDC.org>). This has been done so DEXRON™ required test results can be uploaded in a similar manner as dexos™ required test results. The Test Monitoring Center will be publishing test report packets that are to be used for DEXRON specification tests in the coming weeks. Data to be used for DEXRON fluid approvals are to be upload as each test type becomes effective. The intent is that once all test type report packets are available GM will require future DEXRON specification submissions to utilize test results that have been uploaded to the GM Test Data Center as is done with the dexosESubmission process.

GM Test Data Center contact information is:
